PROFESSIONAL SUMMARY

Computer Engineering student (graduating Jul 2026) with a Google Professional Cybersecurity Certificate and hands-on experience in cybersecurity, full-stack web development, and Python automation. Proficient in penetration testing, vulnerability assessment, MERN stack, CI/CD, and Linux. Seeking entry-level roles in Cybersecurity, Cloud, or DevOps engineering.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, SQL
Web Development: HTML, CSS, MERN Stack (MongoDB, Express.js, React.js, Node.js)
Cybersecurity: Penetration Testing, Vulnerability Assessment, Security Auditing, Threat Detection, SIEM, Wireshark
Cloud & DevOps: CI/CD, Netlify, Linux, Git, GitHub
Tools & Platforms: Android Studio, VS Code, Wireshark, Linux (Ubuntu), Windows
Concepts: Data Structures & Algorithms, Network Security, Incident Response, Access Controls

WORK EXPERIENCE

Cybersecurity Intern Webial Technology Pvt. Ltd. | Anand, Gujarat | May *2025 – Jun 2025*

- Assisted in identifying and mitigating security vulnerabilities through penetration testing, vulnerability assessments, and security audits, reducing potential risk exposure.
- Monitored network and application activity while supporting implementation of security best practices, access controls, and threat detection measures, improving overall security posture and incident response readiness.

Web Developer Young4STEM | Remote | Jul *2024 – Present*

- Enhanced website performance by implementing advanced caching techniques and code minification, resulting in a 40% decrease in page load times across desktop and mobile platforms.
- Conducted comprehensive site audits to identify bottlenecks, reducing server response times by 35% and increasing overall site speed scores by 20%.
- Built and deployed STEM-Games platform using the MERN stack, delivering a scalable interactive learning website hosted on Netlify.

YouTube Team Lead Young4STEM | Remote | *Aug 2024 – Present*

- Led content strategy, production workflows, and publishing schedules for a STEM-focused YouTube channel, driving 30%+ month-over-month subscriber growth.
- Directed topic research, scripting, and performance tracking, contributed to a ~45% increase in monthly viewers and ~78% growth in watch time month-over-month.
- Managed cross-functional collaboration between editors, script writers, designers, and social media teams to optimize engagement.

Ethical Hacking Intern Internship Studio | Remote | *Jul 2024 – Aug 2024*

- Gained hands-on exposure to cybersecurity fundamentals including network security, vulnerability assessment, and penetration testing concepts.
- Worked with industry-standard techniques such as reconnaissance, scanning, and basic exploitation methods to understand system vulnerabilities and threat mitigation strategies.

Python Development Intern Webial Technology Pvt. Ltd. | Anand, Gujarat | *Jun 2024 – Jul 2024*

- Developed and optimized Python-based scripts and backend modules to automate routine tasks and improve data processing efficiency, reducing manual effort significantly.

- Assisted in building and testing application features using Python, identifying bugs and improving code reliability through structured debugging and testing.

PROJECTS

Web Vulnerability Scanner | *Python, Socket Programming* **|** https://github.com/BhavyaKantawala/vulnerability_scanner

- Developed a CLI-based vulnerability scanner in Python capable of detecting XSS, SQL Injection, and open ports across target web applications.
- Injected crafted XSS and SQLi payloads into URL parameters and form fields, analyzing HTTP responses to flag vulnerable endpoints.
- Built a port scanner using Python's socket library to enumerate exposed services; structured the tool with modular architecture for easy extensibility.

STEM-Games Website | *MERN Stack, Netlify* **|** https://stemgames.netlify.app/

- Developed an interactive STEM learning platform from scratch using MERN stack, featuring scalable architecture and engaging game-based content.
- Deployed and hosted on Netlify with continuous deployment configured, ensuring optimized performance and reliable access across devices.

Cybersecurity Audit | *Wireshark, Network Tools*

- Conducted a personal cybersecurity audit on home devices and network systems, identifying vulnerabilities and implementing security hardening measures.
- Performed checks including password policy improvements, software patch management, firewall configuration, and basic network monitoring.

Alumni Management System | *PHP, SQL, HTML, CSS — Creato Hackathon*

- Co-developed an Alumni Management System during a competitive hackathon, designing core features for alumni data management and communication.
- Deployed the application live using tunneling techniques and presented the database-driven prototype to judges, demonstrating rapid problem-solving.

CERTIFICATIONS

Google Cybersecurity Professional Certificate – Google **|** https://www.credly.com/earner/earned/badge/8dda153c-0def-4fe2-802d-092c85648f49

- Completed training in core cybersecurity domains: network security, threat detection, and incident response.
- Gained hands-on experience with Linux, SQL, Python, and SIEM platforms; developed skills in vulnerability identification and risk management.

Creato Hackathon Certificate – BBIT

- Recognized for building a fully functional Alumni Management System using PHP, SQL, HTML, and CSS within a competitive hackathon environment.

LEADERSHIP & ACTIVITIES

Space Week Webinar — Event Organizer & Tech Support

- Organized and managed a Space Week Webinar, coordinating speakers, scheduling, promotions, and technical setup for smooth execution.
- Handled live technical troubleshooting, demonstrating leadership and organizational skills under pressure.

STEM Education Outreach — Mentor & Webinar Facilitator

- Actively involved in mentoring students and facilitating STEM-focused webinars to promote technology education.

EDUCATION

Diploma in Computer Engineering *Expected: Jul 2026*

Gujarat Technological University, Gujarat
